

Sophos Secure Email

Secure email container for Android and iOS

Sophos Secure Email is a containerized, secure, and fully-featured email app for Android and iOS. It lets you isolate your business email, calendar, and contacts from private data on a mobile device when managed by Sophos Mobile Control. All company information is protected with AES-256 encryption and access can easily be revoked based on device compliance rules. Sophos Secure Email is available with Sophos Mobile Control, our complete Enterprise Mobility Management solution.

iOS Highlights

- ▶ Native iOS email experience but with increased administrative control
- ▶ Option to use Sophos Secure Workspace and SafeGuard Encryption to encrypt individual files

Android Highlights

- ▶ Easily and consistently configure secure email across multiple Android versions
- ▶ Add Sophos Mobile Security for Android for proactive protection against malware and potentially unwanted applications (PUAs)
- ▶ Option to use Sophos Secure Workspace and SafeGuard Encryption to encrypt individual files

How it works

Sophos Secure Email creates what is known as a “secure container” on a mobile device for mail, calendar, and contacts. Sophos Secure Email is available for both Android and iOS devices. Email, contacts, and events are synchronized via the Microsoft Exchange ActiveSync protocol. All the data in the container is encrypted. In order to encrypt the data, a 2,048-bit key is generated by the app, which becomes the user's private key.

Mail

Sophos Secure Email for Android and iOS offers all the important functions of a high-performance email app.

Features	Android	iOS
Comprehensive mailer with all the functions to navigate, receive, send, and organize emails on mobile devices	✓	✓
Search for emails by subject, sender, recipient, and email content	✓	✓
Mapping of the entire email folder structure, including moved and deleted emails	✓	✓
Integration with the Contacts module for efficient addressee selection	✓	✓
Email attachments are opened within the secure container so they don't leak into third-party apps and remain encrypted on the device	✓	✓
Integration in Microsoft Exchange via the Microsoft ActiveSync standard protocol versions MES 2007 Active Sync 12.1, 12.2, or MES 2010 Active Sync 14 or 14.1	✓	✓
Predefine short responses to emails for quick replies	✓	-
Configuration for a local signature	✓	-
Configuration of synchronization interval	✓	-

Contacts

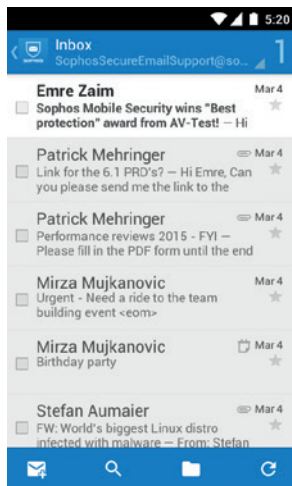

The Contacts module protects business contacts data from unauthorized access. Sophos Secure Email for Android and iOS accesses the contacts from the company's internal Exchange server and encrypts them before storing them on the device. These contacts are also available offline.

Features	Android	iOS
Easy, secure management of contacts	✓	✓
Creation and editing of contacts – both online and offline	✓	✓
Integration with the Mail module	✓	✓
Forwarding of contacts via email	✓	-
Save contacts as favorites or add contacts to lists of favorites	✓	-
Allows synchronizing of contacts' telephone numbers and names with the public contacts list (if the IT Admin permits it in the configuration)	✓	✓

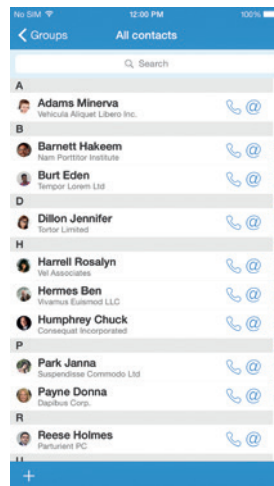

Calendar

In the Calendar module, appointments can be managed easily, efficiently, and securely.

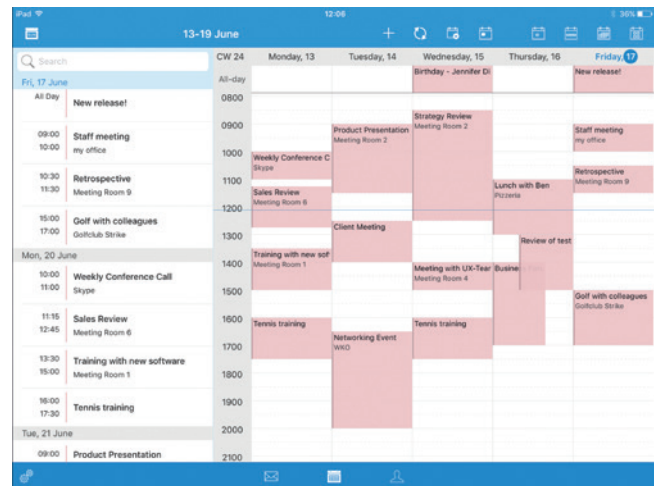

Features	Android	iOS
Easy, secure management of appointments	✓	✓
Efficient creation, addition, and deletion of appointments	✓	✓
Support of serial appointments	✓	✓
Clear overview from a daily, weekly, monthly, and list overview	✓	✓
Comprehensive navigation options, including appointment searches	✓	✓
Synchronization with the Exchange server	✓	✓
Visualization of calendar week numbers	✓	-
